

CERTIFICATE OF ANALYSIS

Work Order	ES2111729	Page	: 1 of 3	
Client	SMK CONSULTANTS PTY LTD	Laboratory	Environmental Division S	ydney
Contact	: Kyra O'Sullivan	Contact	: Customer Services ES	
Address	: P.O.Box 774 39 FROME STREET	Address	: 277-289 Woodpark Road	Smithfield NSW Australia 2164
	MOREE NSW, AUSTRALIA 2400			
Telephone	:	Telephone	: +61-2-8784 8555	
Project	: MIDKIN GIN EPA COMPLIANCE	Date Samples Received	: 31-Mar-2021 11:00	ANULUD.
Order number	: 21-007	Date Analysis Commenced	: 31-Mar-2021	
C-O-C number	:	Issue Date	: 08-Apr-2021 17:22	
Sampler	: Kyra O'Sullivan			Hac-MRA NATA
Site	:			
Quote number	: EN/333			Accreditation No. 825
No. of samples received	: 1			Accredited for compliance with
No. of samples analysed	: 1			ISO/IEC 17025 - Testing

This report supersedes any previous report(s) with this reference. Results apply to the sample(s) as submitted, unless the sampling was conducted by ALS. This document shall not be reproduced, except in full.

This Certificate of Analysis contains the following information:

- General Comments
- Analytical Results

Additional information pertinent to this report will be found in the following separate attachments: Quality Control Report, QA/QC Compliance Assessment to assist with Quality Review and Sample Receipt Notification.

Signatories

This document has been electronically signed by the authorized signatories below. Electronic signing is carried out in compliance with procedures specified in 21 CFR Part 11.

Signatories	Position	Accreditation Category
Ankit Joshi	Inorganic Chemist	Sydney Inorganics, Smithfield, NSW

General Comments

The analytical procedures used by ALS have been developed from established internationally recognised procedures such as those published by the USEPA, APHA, AS and NEPM. In house developed procedures are fully validated and are often at the client request.

Where moisture determination has been performed, results are reported on a dry weight basis.

Where a reported less than (<) result is higher than the LOR, this may be due to primary sample extract/digestate dilution and/or insufficient sample for analysis.

Where the LOR of a reported result differs from standard LOR, this may be due to high moisture content, insufficient sample (reduced weight employed) or matrix interference.

When sampling time information is not provided by the client, sampling dates are shown without a time component. In these instances, the time component has been assumed by the laboratory for processing purposes.

Where a result is required to meet compliance limits the associated uncertainty must be considered. Refer to the ALS Contact for details.

Key: CAS Number = CAS registry number from database maintained by Chemical Abstracts Services. The Chemical Abstracts Service is a division of the American Chemical Society.

LOR = Limit of reporting

^ = This result is computed from individual analyte detections at or above the level of reporting

ø = ALS is not NATA accredited for these tests.

 \sim = Indicates an estimated value.

• EA016: Calculated TDS is determined from Electrical conductivity using a conversion factor of 0.65.

Analytical Results

		Sample ID	21-117-1				
Sampling date / time			29-Mar-2021 00:00				
CAS Number	LOR	Unit	ES2111729-001				
			Result				
	0.01	pH Unit	8.23
